**SUMMARY**

The Safeguard of the Human Life on the Ocean: The Importance of the Qualification in Industrial Safety for Offshore Activities. It's about the teaching-learning process of the Basic Course of Platform Safety, mandatory for Oil Industry activities, it evaluates the safe work practice in the offshore environment. The study was based on the industrial safety standards and the prevention of risks and accidents on the oil units. It was concluded that the education is an instrument for theory-practice association that intervenes in the reality and promotes changes of attitude in the work environment and the daily life.
